Roscoe Waldron turned at the gateway of the house he had just left and re-entered it. Its mistress had not accompanied him to the door and it stood open as he had left it. She had been stunned, dazed, when he had completed his mission by handing her a cold, formal legal document that crushed all of hope and independence

that was left to her. It was a handsome, though antiquated structure, surrounded by what had once been attractive grounds. was sad to contemplate, and the thought had actuated his return, that he had just delivered to Elva Darlington the document which announced to her that it would be her home no

Waldron entered the hall and paused at the door of the great parlor. She sat where he had left her. Her hands were twisted together, her classic face set stonily; her eyes were fixed upon vacancy. There was not the quiver of a muscle. And if some Emry Benett was a recent guest of dread power that paralyzed and deadened had passed over her, she sat rigid as some statue. He advanced into the room. She shivered and looked up, mute despair in her bloodless

"But oh!" breathed Miss Darlington tumultuously, "I cannot bear even to sell the dear old house. I have few friends. My dead brother was my only near relative."

"Take heart of hope," spoke Waldron in a voice unsteady with emotion and quivering with resolve. "Let he to again view that lovely face. The me think over this situation, which appeals to all that is sympathizing with my nature. I feel sure some way will be found to save the property. May I call upon you again tomorrow?"

She bowed her head in assent. She could not speak. Her glance read into brightest of their lives—that upon the very soul of this complete stranger | which they join who held out a hand to save her. Thus pursue their Roscoe Waldron left her, never before in his young life so stirred up mentally.

The pathos and sorrow in the situation were well adapted to impress a true-hearted, impressionable young man. Up to two years previous Elva Darlington and her brother Vincent had lived in the old home. Their parents had left it in debt. Young Darlington was able to earn only a limited income in Leeville. He had gone West to better his conditions. At the end of a year he wrote Elva that he The most important route perhaps, is was about to return; that he had been successful, his letter breathing entire

hope and elation. Vincent Darlington arrived at Leeville, found the house locked up and cisely the day of his return, absent He went to a hotel, was bright and cheery in meeting his friends and acquaintances, and retired about midnight; The next morning Vincent Darlington was found dead in his bed. His hand grasped a revolver, upon the handle of which his initials were scratched. Powder marks showed

around the death wound, indicating close range explosion, and a verdict of suicide was returned by the cor-

Stricken, crushed as she was, Elva Darlington resented this decision. She was able to learn, trying to trace the movements of her brother, that where he changed trains he met Mark Upton, now a worthless vagabond. He was seen to give Upton some money. It was sought to find Upton later, but he had drifted away. His watch and other jewelry were found on Darling ton, and a small amount of money. His life was insured for \$5,000, Elva being the beneficiary named, but the insurance company resisted payment on the ground of suicide.

So, Elva was left without 'a relative in the world, homelessness staring her in the face, for she could not hope to pay off the mortgage when it was due, and hence the visit of Ros-

He noticed the name across the front, "Sanganas House," and he remembered that to be the name of the hotel where Vincent Darlington had met his death. Then he recalled a fact that was startling coincidence. Waldron looked over the papers at the city office, giving details of the suicide.

"June twenty-seventh!" he murmured. "Just a year to-night since the tragedy occurred."

"We can't give you a single room. Would you mind a double-bedded one? You see, we are overcrowded on account of the farmers' convention,' spoke the clerk, when Waldron asked for accommodations for the night. "I would prefer a single room," ex-

here—to the room where I robbed and killed Vincent Darlington. Remorse has haunted me. I in turn was robbed of the money that tempted me when Darlington showed it in giving me enough to keep me from starving. Send for an officer of the law. I wish to make a confession."

It was made, the man died within the hour, and by daylight Elva Darlington knew from Roscoe Waldron that her brother's name was freed from the reproach of suicide and that the old homestead was saved.

She commissioned Waldron to act as her representative in dealing with the insurance company and settling the mortgage. He could have transacted all direct business with Miss Waldron by mail. YES! MAGICALLY! CORNS LIFT OUT WITH FINGERS

You simply say to the drug store man, "Give me a quarter of an ounce of freezone." This will cost very little but is sufficient to remove every hard or soft corn from one's feet.

A few drops of this new ether com-pound applied directly upon a tender, aching corn should relieve the soreness instantly, and soon the entire corn, root and all, dries up and can be lifted out with the fingers.

This new way to rid one's feet of corns was introduced by a Cincinnati man, who says that, while freezone is sticky, it dries in a moment, and simply shrivels up the corn without inflaming or even irritating the surrounding tissue or skin. Don't let father die of infection or
